

AHR IS JUST AROUND THE CORNER

We Are Going “Loopy”

We have been letting everyone know the benefits of expansion/seismic loops for some time. We recently shipped a batch of 6” beauties and this serves as an excellent opportunity to remind everyone of the benefits of loops.

- Motion in all 3 planes
- Less space required
- Easier to install
- Lower system hardware cost
- Fewer anchors needed
- Fewer guides needed

6” Keflex Ke-Loop U-Loop

AHR 2017

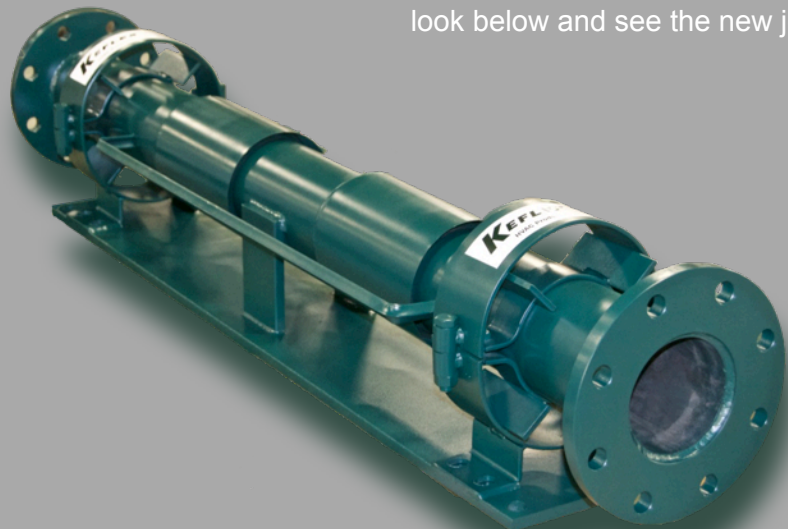

We are getting ready for Vegas! The dates are January 30th through February 1st. We are in booth N11011 for this show. We are looking forward to seeing everyone there. If you’ll remember the last time the show was in Las Vegas a huge snowstorm buried a good portion of the country. Let’s hope that the weather cooperates this time around!

A Blast From the Past

Recently we received an inquiry about an expansion joint we made many, many years ago. We called it the “Guidetrol”. In case you need a refresher, the “Guidetrol” was a dual 311 with integral pipe guides and a center mount that served as an anchor. After decades of service the “Guidetrol” assembly needed to be replaced and with Stephanie’s usual dogged determination and some serious research she was able to resurrect what was needed to build a replacement and BINGO, there it was. Take a look below and see the new joint.

Keflex “Guidetrol” Expansion Joint

The plant and office will be closed from December 24th through January 2nd. We will reopen on January 3rd. HAPPY HOLIDAYS!
