

Product Spotlight

Gold Series concentric reducing braided hose assemblies are an excellent way to simplify installations and reduce system cost. They eliminate the need for a separate reducer and the associated cost of the extra flanges, gaskets, and bolting hardware.

Product Training Reminder

Many of you have taken advantage of the Product refresher/training that Don and I put together, and for those who have, **THANKS**, and we hope it was helpful.

For those of you who haven't yet taken advantage of the opportunity to learn a little bit more about Keflex, give me a call and we'll get a session set up. It only take about an hour and a half max.

Stephanie says it's way **more** entertaining then Dancing With the Stars and way **less** painful then watching Jay Cutler get sacked.

Welcome Aboard!

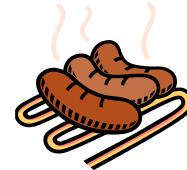

The **BIG GREEN TRAIN** just made a stop in beautiful Appleton, WI and we'd like to welcome aboard the team at Best Group. They will be handling the great state of Wisconsin for us.

They bring a wealth of experience to the table and we are looking forward to helping them serve their customers.

Hanover Fair—April 4th-8th

Guardian Electric will be showing its' wares at the upcoming Hanover Fair! This will include the Keflex product line. We will be in Hall 17, Stand B62/1, for those of you venturing across the pond.

This is our first time at the world's largest industrial trade show. Typically there are 6,000 exhibitors and over 200,000 visitors. This will be great exposure for all our products.
