

October 2013

We're Growing!

In order to continue on our growth curve and add depth to our organization, we are pleased to introduce the newest member of the Keflex team. Jeff Momani joins us taking on the role of Application Sales Engineer.

Jeff is a recent graduate of Northern Illinois University with a degree in Industrial Engineering. Prior to obtaining his degree, Jeff served our nation proudly as a member of the United States Marine Corp.

Here is Jeff's contact information:

Application Sales Engineer

Jeff Momani
815-334-3642
jeffmomani@kelcomail.com

Jeff will be taking over as the primary Keflex contact here in Woodstock over the next few weeks.

With the addition of Jeff to the team, we are also pleased to announce some additional changes. To serve you better, Stephanie Babineau will be assuming the role of Product Sales Manager for Keflex, she'll be out in the field in just a few short weeks. I'm sure you'll be hearing from her in the not too distant future. Please note her new contact number, 720-412-9977

As for myself, I'm assuming the role of Marketing Manager for Guardian Electric and will still be supporting the Flex-Weld/Keflex business in that capacity.

All of our contact information is listed below as well. Please update your records. -TR

From The Factory

Take a look at the beauty below! Don outdid himself in meeting the customer requirements for axial motion, lateral motion, and face to face on the flange dimensions. The solution for this particular Waste Water Treatment Plant ending up being a custom 36" dual bellows 30MC in all stainless steel construction. Check out those projects for Waste Water Treatment Plant upgrades or additions in your area!

When it comes to meeting specific requirements, remember the 5 basic questions we need answered to design a solution.

1. Size of pipe
2. Pressure Range
3. Temperature Range
4. Movement (Axial, Lateral, both)
5. End fittings (Type and Material)
