

WELCOME ABOARD

A hearty "WELCOME ABOARD" to the team at Kenyon Barstow.

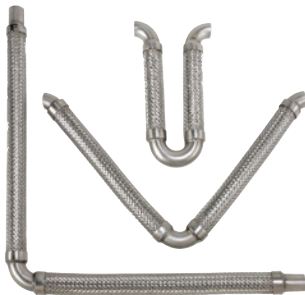

Kenyon Barstow will be handling the states of Maine, Massachusetts, Vermont, New Hampshire, Rhode Island and Connecticut for us.

They bring a wealth of experience to the table and we are looking forward to helping them serve their customers.

AHR EXPO 2015

It is that time of year again! We are busy planning for the show and hope to see everyone there! We'll be putting some focus on nested loops, so come by and talk to us about them. Loops are becoming more and more popular as a solution for not only seismic protection, but also for thermal expansion.

WE ARE BOOTH 6315.

Ke-Loops

7Q / 7QT SERIES IS AVAILABLE LEAD FREE FOR POTABLE WATER APPLICATIONS

We have made the switch to lead free components for our compensators. If your application requires the compensator to be lead free, please make sure and request that on your orders. We are still working our way through our stock of fittings that don't meet the lead free requirement and hopefully those will be out of our inventory in a few short months.

COMING IN 2015

We've got some new products ready to hit the streets this year. Be on the lookout for our higher pressure rated expansion capsule, the 3150 series. This product will be a short length capsule available in sizes from 2" to 12" and will be rated at 150 PSI at 70°F. As usual, a variety of end connections will be available.

We will also be releasing the Silver Series Rubber Expansion Joints. This will be a competitively priced product for everyday applications that don't require multi-ply metal expansion joints.
